

ISA-FROST & SULLIVAN REPORT UPDATE 2008-10

Growth, trends and forecast of India's Semiconductor Market is here!

This elaborate report, mapping the opportunities for the Indian semiconductor market across various end-user applications is the third publication since 2005 when the knowledge partnership between ISA and Frost & Sullivan was established. The first report published in 2005 was a comprehensive analysis of the Indian semiconductor market covering a gamut of topics from product markets to design services. Subsequently an update published in 2007 captured the underlying opportunities in the market succinctly. This 2008 report provides market estimation as well as forecasts for the different semiconductor product markets till 2010 while highlighting the key growth areas during this time period.

This report provides an elaborate demand side mapping of the semiconductor market in India. The application segments covered in this report include:

- » Wireless handsets
- » Communications
- » IT & OA
- » Consumer Electronics
- » Industrial Electronics
- » Automotive Electronics
- » Others (includes Aerospace, Defence, Medical Electronics and Smart Cards)

This report, equipped with insightful information, and an eye on the future of one of the significant and emerging markets in the country, is being published at a crucial juncture. It is uniquely positioned to be the perfect guide for making informed business decisions in the semiconductor and allied markets in India.

Members	Others	Courier charges (additional)
